

# Effective Pressure Area Care

# EHOB TruVue®

## HEEL PROTECTOR

The EHOB TruVue® Heel Protector is used to aid in the prevention of pressure ulcers (for all levels of risk) and in the treatment of pressure ulcers (grades 1-4).

Available in 3 sizes:  
(Petite, Standard and XL)

Adjustable straps to keep the foot in an optimal position (and minimise the risk of foot-drop and the development of ankle contractures).

The EHOB TruVue® Heel Protector is filled with a special mix of fibres which ensures an optimal micro-climate.

# EHOB®

# EHOB® has provided effective solutions for prevention and treatment of pressure ulcers for over 30 years.

## We offer an extensive range of highly effective pressure relieving products to fit your specific needs.

The Achilles Cushion lifts the heel off the support surface.

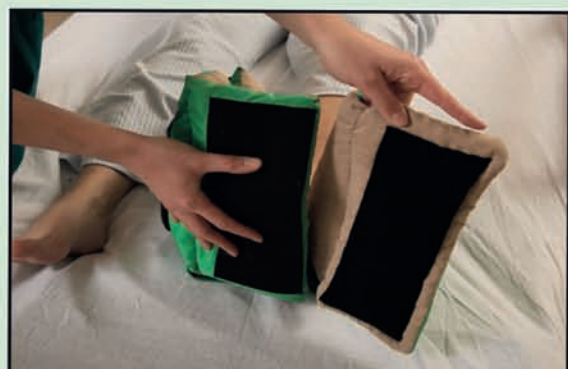

The EHOB TruVue® Heel Protector is built up around the foot and lower limb for optimal levels of comfort and support .

The opening sole allows easy inspection of the heel and plantar surface of the foot. The extra long sole provides protection of the toes.

### Features of the EHOB TruVue® Heel Protector:

- Achilles Cushion
- Rigid Adjustable Anti Foot-Drop Straps
- Anti-Shearing Barrier Pad
- Anti-Rotation Wedge (Optional)
- Elongated Foot Gate height
