

WAFFLE® Product Range

The WAFFLE® Products are made from high grade antimicrobial TPU material with optimal envelopment and immersion properties to ensure clinical efficacy and patient comfort.

VENTILATION HOLES:

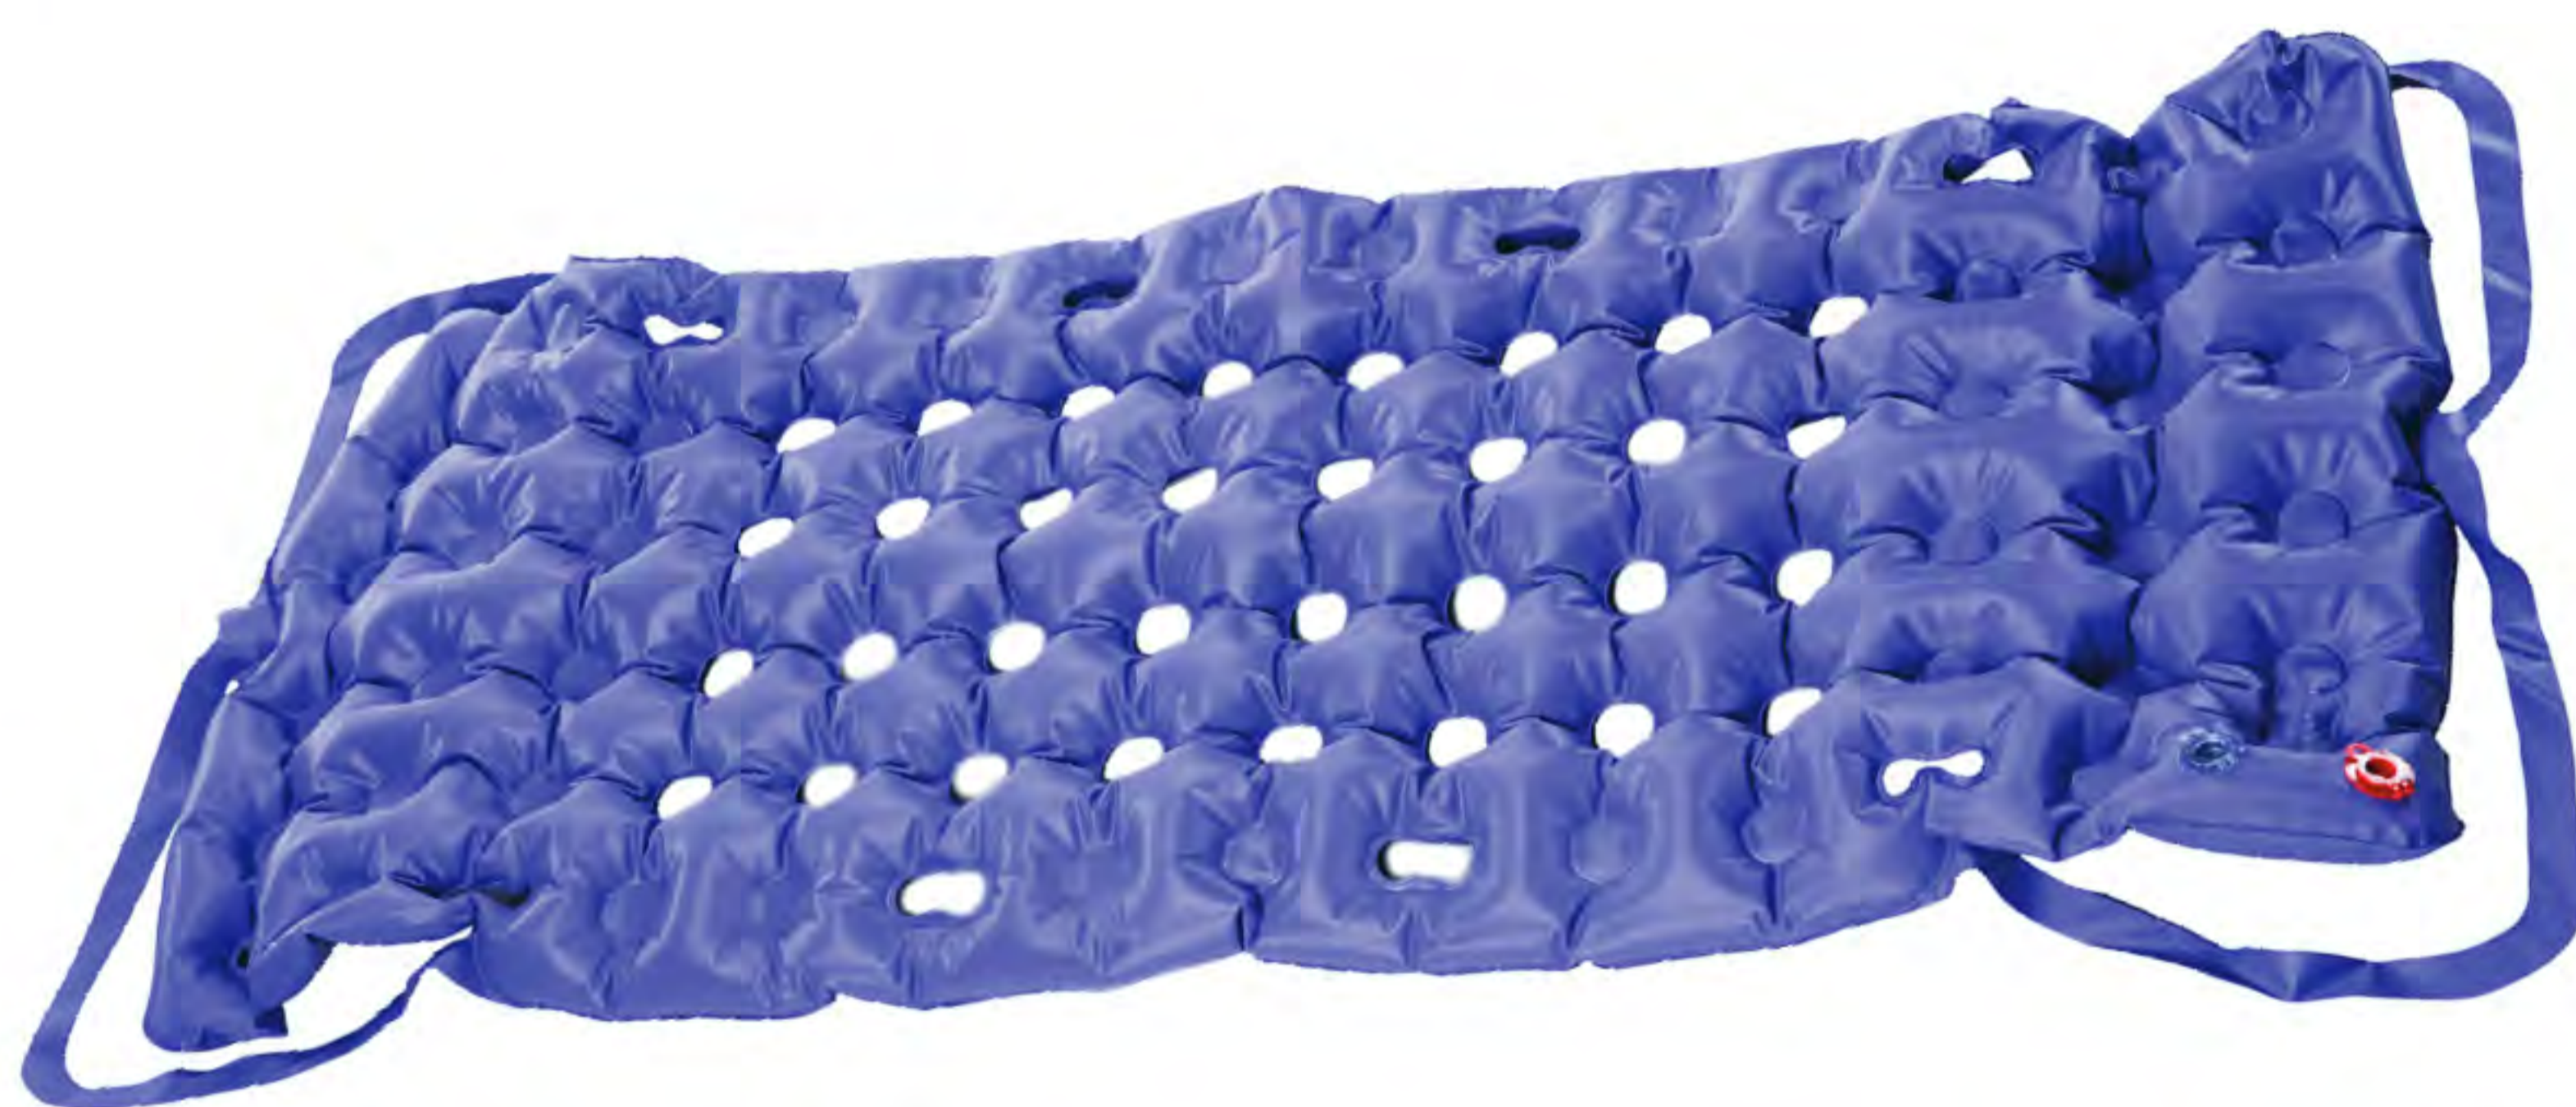

- Aiding the even distribution of pressure across the patients body surface area.
- Provides effective ventilation and optimises micro-climate
- Minimises risk of skin maceration as body fluids are drawn away from the patient skin.

INDICATIONS FOR USE:

- To aid in the prevention of pressure ulcers
- Can be used for all levels of risk
- To aid in the treatment of all categories of pressure ulcers (I-IV)

BENEFITS

- » Highly cost effective
- » Easy to setup
- » Latex Free
- » Up to 372kg weight limit depending on product
- » Antimicrobial agent incorporated which is effective against a wide range of microorganisms including MRSA, C.Diff and E.Coli
- » Low profile
- » 6 month warranty

WAFFLE® OVERLAY

- The 'dog bone' handwells facilitate easy log rolling, mobilising and patient transfers
- Corner Straps secure and centre the overlay on the bed
- Easy Inflation
- Clear valve for inflation and adjustments
- Red CPR valve for rapid deflation

WAFFLE® HEEL PROTECTOR

- The Static Air® design ensures offloading of the heel and effective protection of the foot, ankle and lower limb.
- Easy access to the heel for dressing changes and visual inspection of the heel and foot plantar surface. Heel is continuously offloaded.

TruVue® Heel Protector

The TruVue® Heel Protector is filled with a special mix of fibres which ensures an optimal micro-climate. The Achilles Cushion lifts the heel off the support surface.

- The TruVue® Heel Protector is built up around the foot and lower limb for optimal levels of comfort and support.
- The opening sole allows easy inspection of the heel and plantar surface of the foot. The extra long sole provides protection of the toes
- Adjustable straps to keep the foot in an optimal position and minimise the risk of foot drop and the development of ankle contractures
- Protection against shear forces
- Internal/external rotation minimised with use of the wedge

BENEFITS

- » Rigid adjustable anti foot-drop straps
- » Anti-shearing barrier pad
- » Anti-rotation wedge (optional)
